PROFESSIONAL SUMMARY

Senior Full Stack Engineer with proven track record architecting high-performance cross-platform Flutter applications and scalable backend microservices. Deep expertise designing low-latency real-time systems using WebSockets in Go (Gin), modular REST APIs in Laravel and Django, and complex enterprise ERPs. Specialist in Clean Architecture, reactive state management (GetX/Provider), payment gateway integrations (bKash, Nagad, Stripe, SSLCommerz), and high-throughput concurrent workflows with 99.9% uptime.

PROFESSIONAL EXPERIENCE

N. I. Biz Soft — Uttara-15, Dhaka, Bangladesh

Dec 2023 – May 2026 (2.5+ Years Full-Time)

Senior Software Engineer (Mobile & Backend)

May 2025 – May 2026

- Spearheaded full-stack engineering across multi-platform Flutter apps and microservice backend systems.
- Engineered scalable real-time architectures using WebSockets in Go and live video/audio pipelines (Zego Cloud).
- Designed and optimized RESTful API architectures in Go (Gin), Laravel, and Django with connection pooling.
- Led technical code reviews, guided clean architectural standards, and oversaw CI/CD production deployments.
- Architected high-throughput concurrency models utilizing Go routines for live room streaming and viewer presence.

Mid-Level Mobile & Backend Developer

Apr 2024 – Apr 2025

- Built and optimized full-stack systems bridging cross-platform mobile clients with relational database backends.
- Integrated multi-channel payment gateways including bKash, Nagad, Stripe, and SSLCommerz with webhook verification.
- Implemented real-time bi-directional messaging, order status feeds, and rider GPS location tracking.
- Significantly reduced app cold-start latencies and improved SQL query indexing for large product catalogs.

App Developer

Dec 2023 – Mar 2024

- Developed production-ready cross-platform mobile applications for Android & iOS using Flutter and Dart.
- Implemented clean state management architectures utilizing GetX (Reactive/DI) and Provider patterns.
- Integrated RESTful APIs using Dio and HTTP client with structured interceptors, error handling, and token refresh.
- Built custom responsive UI layouts matching Figma prototypes with high visual fidelity and smooth 60fps animations.

TECHNICAL SKILLS & CORE COMPETENCIES

Mobile App Development
Flutter, Dart, Clean Architecture, MVC/MVVM, Dio/REST, SQLite (Sqflite), SharedPreferences, 60fps Animations, Profiling

State Management
GetX (Advanced: Reactive State, DI, Route Management), Provider (App-wide state), Riverpod (Multi-state handling)

Backend Frameworks
Go (Golang — Gin Framework, Goroutines, Concurrency), PHP (Laravel — MVC, Repository, Blade), Python (Django, Flask)

Databases & Storage
PostgreSQL (PgSQL), MySQL (Schema Design & Indexing), SQLite, Firebase (Firestore & Realtime DB)

Real-Time & Integration
WebSockets, Socket.IO, Zego Cloud WebRTC, bKash, Nagad, Stripe, PayPal, SSLCommerz, JWT, OAuth 2.0, OTP Services

DevOps & Tooling
VS Code, Android Studio, Xcode, Git, GitHub Actions, Postman, Linux Environment, Docker (Containerization Basics)

KEY COMMERCIAL & PRODUCTION PROJECTS

1. Live Streaming Mobile Platform

[Live Link: play.google.com/store/apps/details?id=com.swish.app]

Role: Full Stack Engineer (Flutter + Go Microservices) | **Platform:** Flutter Mobile App + Go (Golang) Microservice Backend

Architecture: Separate Go microservices (API Server + Core Backend), WebSocket real-time pipelines, and Goroutine concurrency.

- Engineered real-time audio and video live streaming with host approval room join/leave workflow.
- Integrated VIP instant-join privileges, virtual gift economy system, and live rankings with animated entries.
- Handled high-throughput viewer concurrency utilizing Go routines, event dispatchers, and stateful memory caches.

2. LA'AM Enterprise Garments ERP System

[Live Link: erpecom.deepverselab.com/login]

Role: System Architect & Backend Developer | **Platform:** Web Platform (Laravel + MySQL) + WordPress API Pipeline

Architecture: Laravel MVC engine with direct WordPress order sync, inventory webhooks, and courier tracking pipelines.

- Multi-tier employee Role-Based Access Control (RBAC), team permissions, and incentive calculation rules.
- Courier auto-tracking with dynamic weight-based shipping calculation and real-time inventory ledger.
- Complete accounting module (income, expense, profit/loss balance sheets) and employee internal wallet system.

3. Xovalley — Multi Vendor E-commerce Platform

[Live Link: xovalley.com & play.google.com/store/apps/details?id=com.xovalley.user_app]

Role: Full Stack Engineer (Laravel + Flutter + System Design) | **Platform:** Web (React.js) + 3 Flutter Mobile Apps + Laravel REST API

Architecture: Unified Laravel API backend powering customer, vendor, and rider Flutter apps with live delivery tracking.

- Multi-vendor marketplace cataloging, seller commissions, and automated vendor payout ledger.
- Customer App, Seller App, and Delivery Man App with live Google Maps rider GPS location updates.
- Integrated multi-channel payment gateway verification (bKash, Nagad, debit/credit cards) with webhook logs.

KEY COMMERCIAL & PRODUCTION PROJECTS (CONTINUED)

4. ARACO Healthcare Ecosystem

[Live Link: araco.com.bd]

Role: Full Stack Engineer (Flutter + Django + System Design) | **Platform:** Flutter App (GetX) + Django Web Admin + Zego Cloud

Architecture: GetX client state architecture connected to Zego Cloud WebRTC pipelines and Django administration backend.

- Online pharmacy with digital prescription upload, order fulfillment, and automatic customer dispatch.
- Doctor appointment scheduling with encrypted video/audio consultations powered by Zego Cloud WebRTC.
- Clinical lab test home sample collection booking, automated report delivery, and clinic admin POS billing.

5. Propeta — Real Estate Discovery Platform

Role: Full Stack Engineer (Flutter + Django + System Design) | **Platform:** Flutter Mobile Application + Django REST API Backend

Architecture: Layered Service-Repository architecture with geocoded spatial indexing and local offline state caching.

- Multi-criteria spatial search & filtering (price brackets, geo-coordinates, property types, and verified amenities).
- Agent portfolio verification, in-app client inquiry routing, and high-resolution photo gallery viewer.

6. CashMart — Digital Banking & Mobile Wallet

Role: Backend Engineer (Django API) & Mobile Developer | **Platform:** Flutter Mobile Application + Django (Python) Backend

Architecture: Secure cryptographic ledger with multi-factor OTP validation and QR code transaction verification.

- Instant peer-to-peer balance transfers, QR code cashout at agent outlets, and exportable PDF statements.
- Tiered deposit rewards, profit-sharing calculation rules, and strict audit-trail security logging.

EDUCATION & ACADEMIC BACKGROUND

BSc in Computer Science & Engineering (CSE) — **Bachelor of Science**
Uttara University, Dhaka · Status: Running / Enrolled

Diploma in Engineering — **CGPA: 3.68 / 4.00**
Sylhet Polytechnic Institute, Sylhet · Status: Completed

Higher Secondary Certificate (HSC) — **GPA: 4.33 / 5.00**
M.A.H.K Bhashani Degree College · Status: Completed

Secondary School Certificate (SSC) — **GPA: 4.33 / 5.00**
P.T.M High School · Status: Completed

PROFESSIONAL TRAINING & CERTIFICATIONS

Mobile Application Development (Flutter & Dart) — **Aug 2023 – Nov 2023**
Atova Technology — Comprehensive training in Clean Architecture, reactive state, and native platform channels.

LANGUAGES

- Bangla — Native fluency
- English — Professional working proficiency

CORE ARCHITECTURAL STRENGTHS

- Full-Stack system architecture & high concurrency (Goroutines)
- Production Clean Architecture & maintainable modular code
- Low-latency WebSocket & WebRTC media streaming systems
