Professional Summary

Full Stack Engineer specializing in high performance Flutter applications and scalable backend systems. Proven experience in designing real time architectures using WebSocket, building fintech, healthcare, live streaming and e-commerce platforms. Strong focus on clean architecture, modular code and production ready system design.

Professional Experience

Senior Software Engineer (Mobile & Backend), N. I. Biz Soft 12/2023 – 05/2026
Uttara-15

- Leading full stack system development (Flutter + Backend)
- Designing scalable real time architectures (WebSocket based systems)
- Backend development in Go (Gin), Laravel & Django
- System design for fintech, e-commerce and live streaming platforms
- API architecture design & performance optimization
- Mentoring junior developers and reviewing code structure
- Handling production level deployments and system stability

Mid-Level Mobile & Backend Developer

- Worked as Full Stack (Flutter + Backend) developer
- Built scalable API integrations with backend systems
- Implemented real time features using WebSocket (Go)
- Payment gateway integration (bKash, Nagad, SSLCommerz)
- Improved app performance & backend response time
- Collaborated on system level architecture decisions

App Developer

- Flutter mobile application development (Android & iOS)
- REST API integration and UI implementation
- State management (GetX / Provider)
- Bug fixing, feature implementation and app maintenance
- Clean architecture basics (Service + Repository pattern)

Education

BSC in CSE, *Uttara University*
Running
Diploma in Engineering, *Sylhet Polytechnic Institute*
CGPA: 3.68 / 4.00
HSC, *M.A.H.K Bhashani Degree College*
GPA: 4.33 / 5.00
SSC, *P.T.M High School*
GPA: 4.33 / 5.00

Technical Skills

Mobile App Development (Flutter)
- Cross platform app development (Android & iOS)
- Clean Architecture (Layered, Scalable, Maintainable)
- MVC, MVVM design patterns
- API Integration (REST, Dio, HTTP)
- Performance optimization & reusable components

Local Storage (Flutter)
- SQLite (Sqflite)
- Structured relational local database
- Complex query handling
- Data persistence with schema design
- SharedPreferences
- Key value storage
- Lightweight data persistence (token, settings)

Database Systems
- MySQL (Relational database design & optimization)
- PostgreSQL (Relational schema design & indexing)
- Firebase Firestore / Realtime Database

Tools & Environment
VS Code, Android Studio, Xcode, Git, Postman, Docker (Basic)

State Management (Flutter)
- GetX (Advanced)
- Reactive state management
- Dependency Injection
- Route management
- Provider (Advanced)
- Scalable state handling
- App-wide state management
- Riverpod (Mid Level)
- Scalable state handling
- Big project and multi state handling

Backend Development
- Go (Golang) – Gin Framework
- REST API development
- WebSocket (real time system)
- Middleware, routing, error handling
- Concurrent system design
- PHP (Laravel)
- MVC architecture
- Repository architecture
- REST API development
- Authentication & authorization
- ERP & E-commerce system
- Blade, Ajax
- Python (Django backend & API & Template Based, Flask)

System Design & Integration
- Real time systems
- Payment gateway integration
- bKash, Nagad, Stripe, PayPal, SSLCommerz
- OTP & token based authentication
- API security & performance optimization

Key Projects

Live Streaming Platform
https://play.google.com/store/apps/details?id=com.swish.app **Platform:** Flutter App + Go Backend (Microservices Architecture)

System Architecture:
- Separate Go based microservices (API Server + Streaming Core Backend)
- WebSocket based real time communication system
- Scalable event driven architecture for live interactions

Core Features:
- Real time audio/video live streaming
- Live room join/leave system
- Host controlled join request approval system
- VIP instant join & premium access system
- Gift sending & virtual economy system

- Live ranking system with entry animations
- Viewer tracking in real time
- High performance concurrency handling (Go routines)

Role: Full Stack Engineer (Flutter + Go Microservice Backend)

LA'AM ERP System, Enterprise Resource Planning System

Platform: Web System + Backend https://erpecom.deepverselab.com/login

Core Modules:

- Employee Management System (Role based access control)
- Team based role & permission system
- Incentive system per employee & per product
- Courier integration system
- Auto courier status tracking system
- Shipping system (weight based calculation)
- Inventory management system
- Accounting module (income, expense, profit/loss)
- Wallet system for employees
- Reporting dashboard (full business analytics)

Integration Systems:

- WordPress plugin integration (order sync)
- WordPress order -> direct ERP pipeline
- Real time order & inventory sync

Role: System Architect & Backend Developer

Xovalley – Multi Vendor E-commerce Platform

Platform: Web + Mobile + Admin + Delivery System Backend
Backend & Web: Laravel (API + Core Business Logic) · React.js (Web Frontend) · https://xovalley.com
Mobile App: Flutter (Customer App, Seller App, Delivery Man App) · Google Play Store

Features:

- Multi vendor marketplace system
- Product, cart, order management
- Delivery tracking system
- Affiliate marketing system
- Commission & payout system
- Payment gateway integration

Role: Full Stack Engineer (Laravel + Flutter + System Design)

ARACO Healthcare System, Healthcare Ecosystem

https://araco.com.bd **Platform:** Flutter App + Web System Backend: Django + Template based Admin Panel

Mobile App Features (Flutter + GetX):

- Online pharmacy system (medicine order + prescription upload)
- Doctor appointment & telemedicine system
- Video/audio calling (Zego Cloud integration)
- Lab test booking system
- Caregiver booking system
- Health package subscription system

Healthcare Workflow:

- Patient -> Doctor appointment -> Video consultation -> E-prescription
- Lab technician home collection system -> digital report delivery
- Health package auto doctor assignment system

Admin System:

- Role based access control (RBAC)
- POS system
- Inventory management
- Invoice generation
- Staff & doctor management system

Role: Full Stack Engineer (Flutter + Django + System Design)

Propeta – Real Estate Platform

Platform: Flutter App + API Backend

Features:

- Property listing system
- Property search & filtering
- Agent based listing system
- API driven architecture
- MVC based backend structure

Role: Mobile App Developer

CashMart – Digital Banking + E-commerce System

Platform: Flutter App Backend: Django (Python)

Core Banking Features:

- Send money system
- Cashout via QR system
- Transaction history with export (PDF)
- OTP based authentication
- Wallet system

E-commerce + Finance Hybrid:

- Product purchase system
- Profit sharing system (purchase based earning logic)
- MLM style deposit & reward system
- Balance + commission tracking system

Role: Backend Engineer (Django API Development)

Training

Mobile Application Development (Flutter), Atova Technology 08/2023 – 11/2023

Programming Languages

Programming Languages
Dart, Go, PHP, Python

Languages

Bangla
Native

English
Fluent

Core Strengths

- Full Stack System Development
- Real time Application Engineering (WebSocket, Socket.io)
- Clean & Scalable Architecture
- API Design & Integration
- Problem Solving & Performance Optimization
