Professional Summary

Software engineer focused on designing, building, and maintaining mobile applications, backend services, full-stack products, and real-time systems. Works across Flutter, Go, Laravel, and Next.js, with practical experience in API-driven product development, admin panels, service architecture, and Dockerized delivery.

Core Skills

- Mobile development: Flutter, Dart, GetX, Riverpod, Provider, Dio, API integration
- Frontend development: Next.js, React, TypeScript, JavaScript, HTML, CSS
- Backend development: Go, Gin, GORM, PHP, Laravel, REST APIs, MVC architecture
- Databases and caching: PostgreSQL, MySQL, Redis, SQLite, Firebase
- Realtime and streaming: WebSocket, Socket.IO, WebRTC, LiveKit, live chat, presence and notifications
- Architecture: Microservices, service boundaries, API-first design, authentication, role-based access
- DevOps and delivery: Docker, Linux, Nginx, CI/CD, GitHub Actions, Git, deployment troubleshooting
- Product areas: Mobile apps, ecommerce, ERP, admin dashboards, live streaming, customer support workflows

Professional Experience

Senior Software Engineer — N. I. Biz Soft

Update this section with your exact employment dates.

- Develop and maintain mobile applications and backend services.
- Implement API-driven features and coordinate mobile, backend, and administration workflows.
- Contribute to maintainable architecture, integration quality, and production-focused improvements.

App Developer / Mid-Level Developer (App & Backend) — N. I. Biz Soft

Update this section with your exact employment dates.

- Built Flutter application features and integrated backend APIs.
- Worked with application state management, backend-driven screens, and product functionality.

Selected Projects

SportsBD

Flutter · Go · Next.js · WebSocket

Sports platform covering mobile app experiences, Go backend services, real-time communication, notifications, and web administration.

Live Streaming Platform

Flutter · Go · LiveKit · WebRTC

Live rooms, host-approved join requests, VIP and moderator flows, viewer presence, realtime events, and account/device security workflows.

Ecommerce Systems

Next.js · Go · Laravel · PostgreSQL · Docker

Customer and admin experiences, authentication/session handling, guest and signed-in cart/wishlist flows, support chat, and containerized backend services.

ERP & Business Applications

PHP · Laravel · MySQL · REST APIs

Business workflows, ERP/ecommerce features, API integrations, and maintainable server-side application logic.

Mobile Product Development

Flutter · Dart · Dio · GetX · Riverpod

Mobile application development and API integration across customer-facing and service-oriented products, with modular state management and maintainable UI flows.

Engineering Focus

- Mobile app architecture, state management, and API integration
- Backend services, REST APIs, data modeling, and business logic
- Realtime communication, live streaming, chat, presence, and notifications
- Ecommerce, ERP, customer support, and administration workflows
- Microservices, Dockerized environments, CI/CD, and system architecture
